

Nabors Well Services – Liberty, Texas

Employment Opportunities Available

Crew Worker, Derrick Worker, Crew Chief & Rig Supervisor

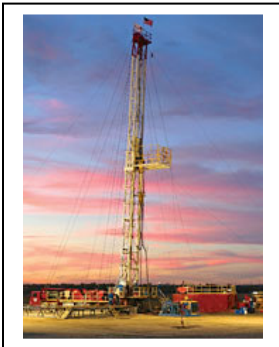

The **Crew Worker** works on a well servicing rig and is responsible for performing services on oil and gas wells. The duties of the Crew Worker include assisting in rigging-up and rigging-down, pulling/laying down rods, tubing, and casing as well as other functions specified by the customer or well operator. All duties are to be performed according to the Company's Operating Procedures in order to maximize the safety of all personnel at the work site and to most efficiently perform the task.

The **Derrick Worker** works on a well servicing unit and is responsible for performing services on oil and gas wells. The duties of the Derrick Worker include performing all well-servicing tasks from an elevated position (rod basket or tubing board.) The Derrick Worker will also assist in rigging up or down, picking up or laying down rods/tubing, and other functions specified by the customer or well operator. All duties are to be performed according to the Company Operating Procedures in order to maximize the safety of all personnel at the work site and to efficiently perform the task.

The **Crew Chief** runs and operates the well servicing unit and is responsible for performing services on oil and gas wells as specified by the customer and or well operator. The duties of the Crew Chief may include driving the crew truck and well service rig, assisting in rigging up/down, and operating the rig and its components as necessary. All duties are performed according to the Company operating procedures in order to maximize the safety of all personnel at the work site and to efficiently perform the task.

The **Rig Supervisor** will assist expediting his/her assigned rig crews into the field at the beginning of the workday. This may include assisting the crews in obtaining the supplies needed to complete the days activities, collecting work tickets from the previous days work, gathering additional equipment required, communicating any changes to the work plans for the current job and any requests made by the customer. The Rig Supervisor is required to make, have, and maintain good customer relations with those customers that his/her assigned rigs deal with on a daily basis. This may also include communications of customer requirements back to the rig crew on an ongoing basis. This position requires the ongoing maintenance and repair of the equipment associated with the work group and may require the supervisor to direct the work. The Supervisor's duties are to be performed according to the Company operating procedures in order to maximize the safety of all personnel at the work site and to efficiently perform the task. Normally responsible for supervising one rig; provides direct operational supervision to the rig personnel; not responsible for a budget.

Must Pass Drug Screen, Physical Functions Assessment & Background Screen.
